

← BACK TO CLASS

OPEN MENU

8. To make changes to index.html, open the file in your text editor.

9. Under the `<div class="greeting">`, add a paragraph with `href="https://www.git-scm.com/doc">here!`

10. Save the changes to your index.html file.

11. Preview the index.html file again in your browser to view your changes to the file.

12. Navigate back to the command line. Add and commit your changes.

13. Run `git status` to make sure your commit was successful.

14. Run `git log` to view your commits. Your newest commit will appear first. Nice work!

15. When you're done, take a screenshot of your command line showing all of your commands. Upload the screenshot below!
